Average Teacher Salaries, Massachusetts Public Schools, FY98 to FY03

http://finance1.doe.mass.edu/schfin/statistics/teacher_salary.aspx

Average teacher salary data is derived from annual "End of Year Pupil and Financial Report" data submitted by school districts. The data are reported in full-time equivalents and include all professional teachers whose salaries are supported by the state. Salaries can vary considerably from year to year, depending upon the length of teacher service, terms of contracts, and other factors.

The FY03 averages are preliminary. Some districts' FY03 averages are not published because there are questions about the data. As these questions are answered, the list will be updated.

Last update 5/21/04
